Forecast for Sunday 21 Apr 2024

Weather: A dry day though often cloudy with some sunshine breaking through cloudier skies at times, particularly into the afternoon as temperatures rise.

Chance of cloud-free hill tops above 600m: 70% in the morning, quickly rising to 90% during the day.

Low cloud and visibility: A low risk of some patchy mist and hill fog during the early hours but dissipating quickly leaving little to no low cloud and excellent visibility.

Meteorologist's View

A chilly start but warming up through the afternoon so layers advisable. Sunscreen also recommended with moderate UV levels by the afternoon.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Monday 22 Apr 2024

Weather: A chance of some brightness during the early hours of the morning but generally a much cloudier day with patchy rain and drizzle. Cloud low at times leading to some patchy fog across upslope regions where there is a chance of more prolonged spells of rain. Feeling much cooler too compared with Saturday.

Maximum wind: Northerly winds 10-15 mph, gusting 20-25 mph.

Chance of cloud-free hill tops above 600m: 50% during the early hours but quickly lowering to 30%.

Low cloud and visibility: Extensive low cloud as outbreaks of rain and drizzle spread across the park. Visibility good in drier spells, otherwise moderate to poor in precipitation and amongst upslope low cloud.

Temperature: **Valleys:** Plus 3 Celsius rising to plus 11 Celsius.
At 600m: Zero Celsius rising to plus 6 Celsius.
Freezing level: Above summits.
